React.js Developer | Frontend Engineer | 3 Years Experience

PROFILE SUMMARY

Frontend Developer with 3 years of experience specializing in React.js, delivering scalable and high-performance enterprise applications across government, insurance, and telecom domains. Strong expertise in building reusable component architectures, optimizing frontend performance, and developing dynamic UI solutions such as chat interfaces and smart search. Focused on writing clean, maintainable code and creating responsive, user-centric experiences.

TECHNICAL SKILLS

Frontend: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Material-UI, Bootstrap
State Management & API: Redux, REST APIs, Axios, Service Layer Architecture
Authentication & Security: JWT, Role-Based Access Control, Protected Routes
Performance Optimization: Lazy Loading, Debouncing, Pagination, Infinite Scroll
Advanced Concepts: Custom Hooks, Error Boundaries, Reusable Components
Data Visualization: Recharts, Highcharts
UI/UX: Responsive Design, Accessibility
Tools: Git, GitHub, VS Code
Cloud: Microsoft Azure

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) — System Engineer
Nov 2021 – Oct 2025 | Hyderabad

- Developed scalable React.js applications serving up to **500K** users, improving load performance and UI responsiveness by optimizing rendering and API handling.
- Designed reusable component architecture**,** reducing development time by **30%** and ensuring consistency across multiple enterprise applications.
- Implemented dynamic UI features including auto-suggestions, chat interfaces, and smart search, enhancing user experience.
- Designed and delivered interactive dashboards using Recharts and Highcharts for real-time data visualization.
- Integrated secure authentication and authorization using JWT and role-based access control.
- Optimized API communication using Axios interceptors and centralized service layers; owned **end-to-end development** from requirements to deployment.

- Improved frontend performance using lazy loading, debouncing, pagination, and efficient state management techniques.
- Utilized **React Hooks (useMemo, useCallback, useRef)** to optimize rendering and improve performance.
- Collaborated with cross-functional teams including backend, QA, and product stakeholders to deliver high-quality enterprise applications**.**

PROJECT EXPERIENCE

Government Service Portal - Tech: React.js, Redux, REST APIs, Material-UI

- Developed high-traffic React.js applications serving **50K–500K users**
- Improved UI responsiveness and accessibility compliance

Health Insurance Systems - Tech: React.js, Redux, Axios, Bootstrap

- Built Admin dashboards, chat UI modules for managing policy workflows
- Integrated REST APIs and improved UX through data visualization

Telecom Customer Analytics - Tech: React.js, Recharts, High charts, REST APIs

- Developed customer-facing modules and business intelligence dashboards
- Improved data visibility using interactive charts and optimized API handling

Food & Beverage Platforms - Tech: React.js, JavaScript (ES6+), CSS3

- Delivered UI enhancements and optimized user journeys
- Built reusable and customizable frontend components

KEY ACHIEVEMENTS

- Reduced dashboard development time by **30%** through reusable architecture
- Increased user engagement by **25%** with improved UI/UX enhancements
- Delivered applications used by **50K–500K users nationwide**
- Achieved **80% success rate** in client feature adoption

CERTIFICATIONS

- Google Cloud Associate Cloud Engineer
- React.js Certification (TCS Internal)

EDUCATION

Vignan's Institute of Engineering for Women, Visakhapatnam, Andhra Pradesh
Bachelor of Technology | CGPA: 7.35 | 2017–2021
